CAREER OBJECTIVE

Seeking a role as a Full-Stack Developer where I can apply my experience with the MERN stack,Next.Js, Typescript and blockchain technologies to develop efficient, user-focused web applications.

SKILLS

- **Next.js, TypeScript, Node.js**
- **Prisma ORM, PostgreSQL, MongoDB**
- **MERN Stack (Full-Stack)**
- **Rest APIs, Tailwind CSS**
- **Docker (Deployment), Git**
- **HTML, CSS, JavaScript**
- **WebSockets**
- **Web 3 (Solana, Ethereum)**
- **Rust, Solidity (Smart Contracts)**

EDUCATION

Bachelors in Computer Application (BCA)   2022-2025
Nims University, Rajasthan, Jaipur

Secondary Education   2019-2021
Emmanuel Sr. Sec School, Jhalawar, Rajasthan
81.6%

INTERESTS

- Playing Chess
- Reading business-related books
- Sketching & Doodling

LANGUAGES

- English
- Hindi

WORK EXPERIENCE

Purezza Technologies , Gujarat   **(Remote Internship)**
Jan 2024 – Mar 2024

- Created responsive, consistent designs for two major projects: a **Resume Creation Site** and a **Matrimony Site**.
- Collaborated with a team to build components for a full-stack application using React, React Redux and Node.js.
- Assisted in payment gateway integration and API development for seamless transaction processing.

PROJECTS

Safe - Shipping   [Github](#)   [Try it out](#)

Developed a decentralized freelancing platform using Solana Blockchain, enhancing transparency in freelance work and transactions.
(Solana Blockchain | Rust | Solana SDK | Typescript | NextJs)

Food - Copilot   [Github](#)   [Try it out](#)

A ML based smart application designed to manage food items, plan meals according to schedule, and receive personalized recipe suggestions.
(Gemini API | Spoon API | TypeScript | Next.Js | Tailwind CSS)

E-commerce Grocery Store   [Github](#)   [Try it out](#)

Sample E-commerce website to buy grocery items of different categories.
(**MongoDB | ExpressJS | React |NodeJS | React Redux | Auth System**

ACHIEVEMENTS

Winner (Scroll Category) – BlockMagic Hackathon   May-June 2024
Developed Ringle , a decentralized exchange (AMM) for buying and selling NFTs, won under Scroll Category out of 300+ Projects and 1800+participants.

- Built the platform on the **Ethereum blockchain** with integration to **Polygon** for scaling and lower transaction costs.
- Designed and deployed **smart contracts** using Solidity to enable automated liquidity provision for NFTs.
- Led a 3-person team to design the frontend (Next.Js) and project management.

Third Winner - Innovation Think Tank (ITTCP), India   May-June 2024

- Showcased multiple solutions focusing on the intersection of medicine and technology, hosted by IITCP.
- Collaborated with a team of 8 members from diverse backgrounds including medical and engineering.

One of the Winners – 100x Devs Mini Hackathon   September 2024

- **Wallet Adapter** for Web-Based Wallet on **Solana** blockchain.
- Created and published npm package for wallet adapter in JavaScript for connecting web based wallets and transaction signing.
